FELIPE DAMASCENO REIS GOMES

AI & Automation for Video · Python, n8n, LLMs · Video Editor

Rio de Janeiro — RJ · (21) 9 7455-4444 · felipedrg02@gmail.com · github.com/lipereis · linkedin.com/in/felipe-gomes-0220b7247 · lipereis.github.io/engineer-portfolio

PROFILE

I'm Felipe Gomes — moving from communication and audiovisual work into software, focused on backend and AI engineering. My foundation is storytelling, production, and content operations; today I point that same discipline at building digital products. I'm self-taught in JavaScript, React, Node.js, and Python, with published projects (an AI editor for vertical video, plus tooling built on retrieval, vector search, and re-ranking) and constant practice in version control and deployment. I'm looking for a Backend / AI Engineer role where product reasoning, delivery discipline, and growing full-stack depth all count.

TECHNICAL SKILLS

AI / AI Engineering: RAG (Retrieval-Augmented Generation), Vector search (Chroma), Keyword search (BM25), Re-ranking (FlashRank), Gemini / Claude / OpenAI APIs, Prompt engineering

Backend: Node.js, REST APIs, Next.js Route Handlers, Auth & API integration

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React, Next.js, Tailwind CSS, HTML / CSS, Framer Motion

Databases: PostgreSQL, SQLite

Tools & Deploy: Git / GitHub, VS Code / Cursor, Vercel, Docker, n8n, Streamlit, Notion

PROJECTS

HookEdit — 2026

AI editor for vertical video. Transcribes uploads with word-level timestamps (faster-whisper), builds dynamic captions, and uses Gemini to suggest retention edits (cuts, B-roll, sound effects, hook review). Renders the final clip with a single ffmpeg filter graph.

Stack: TypeScript, Next.js, Python, FastAPI, faster-whisper, Gemini API, ffmpeg

Live demo: hookedit.vercel.app

TaxaSense — 2026

B2B SaaS for investment advisory firms, in development with a partner: computes real returns net of income tax and inflation and compares taxed assets with tax-exempt equivalents, producing a report under the firm's brand. Among my deliveries: the WhatsApp bot webhook (Supabase Edge Functions) and the persistence of prospects and reports in Postgres, through reviewed pull requests.

Stack: Python, FastAPI, TypeScript, Next.js, Supabase (Postgres), WhatsApp Cloud API

Team project, private repository

Video Content Pipeline — 2026

n8n workflow that turns a video into a first draft of social content: Whisper transcription, then hooks, script, and captions written by a local LLM (Ollama). A FastAPI worker holds the logic; failed videos are kept in a separate folder with the reason. Runs fully local in Docker.

Stack: n8n, Docker, Python, FastAPI, faster-whisper, Ollama, pytest

Repository: github.com/lipereis/video-content-pipeline

jobfit — 2026

Tool that scores job postings against a resume, requirement by requirement, with a command line, a FastAPI API and a web page. Reads company boards through public APIs into SQLite and uses rule-based scoring with no language model. Run on 1,917 real postings, it exposed four scoring flaws that became rules and tests; a labelled set gates every change.

Stack: Python, FastAPI, SQLite, SQL, pytest, GitHub Actions

Repository: github.com/lipereis/job-fit

TrainFlow — 2026

AI-powered operating system for personal trainers: client management, program building, and assisted planning.

Stack: TypeScript, Next.js, Node.js

Repository: github.com/lipereis/TrainFlow

RAGCore 2026

Local Retrieval-Augmented Generation engine for querying PDF documents. Combines semantic search (Chroma) with keyword search (BM25), local re-ranking via FlashRank, and grounded answers through the Gemini Flash API.

Stack: Python, pdfplumber, Chroma, BM25, FlashRank, Gemini API

Repository: github.com/lipereis/RAGCore

EDUCATION

Pontifical Catholic University of Rio de Janeiro (PUC-Rio) Completed June 2024

B.A. in Social Communication — Narrative, media production, and audience thinking — the base I now apply to product and engineering work.

FIAP In progress

Software Engineering — Software quality assurance techniques and the control and management procedures of the development cycle.

DataCamp In progress

Courses in progress — Currently enrolled and studying on DataCamp.

Coursera In progress

Courses in progress — Currently enrolled and studying on Coursera.

Origamid (self-paced) Completed modules

Web Design & Frontend Fundamentals — JavaScript, React, Backend with Node.js, and Tailwind CSS course tracks.

freeCodeCamp Certifications

Python & Full Stack tracks — Python fundamentals and full-stack web development coursework.

Independent study Continuous

Self-taught Software Path — React, Next.js, TypeScript, and AI tooling learned by shipping public GitHub projects.

PROFESSIONAL EXPERIENCE

Audiovisual Analyst — Nosso Olhar Carioca Aug 2025 — Present

Shoot and edit cinematic Reels about Rio de Janeiro for an Instagram page with around 13K followers; plan topics and short scripts; color grade in DaVinci Resolve and finish in Premiere Pro.

Social Media — TikTok & YouTube Shorts — Coreboyshubclips Sep 2024 — Present

Curated, edited, and published short-form video; tracked performance and iterated on what worked.

Digital Content Creator — @ladobdacena — TikTok & Substack 2023

Produced content on cinema and audiovisual culture; wrote articles and newsletters; managed the community.

Intern — Editing Suites — PUC-Rio Aug 2023 — Feb 2024

Edited and finished audiovisual projects, organized post-production workflows, and gave technical support to students and faculty.

LANGUAGES

Portuguese — Native | English — Advanced | Spanish — Advanced
